VRAJ PATEL

Full Stack Web Developer

Mumbai, India | +91 9209098406 | vraj75228@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Java Full Stack Developer with expertise in React.js and Spring Boot, experienced in building scalable, secure web applications. Skilled in API integration, session management, and performance optimization, with a passion for delivering seamless user experiences.Seeking React.js developer roles where I can leverage full stack expertise to build scalable, user-focused applications.

SKILLS

- **Frontend**: React.js, JavaScript (ES6+), HTML5, CSS3, GSAP, Bootstrap, Tailwind
- **Backend**: Java, Spring Boot, Spring MVC, Servlets, JSP, REST APIs
- **Databases**: MySQL, SQL, JDBC
- **Tools**: Git, GitHub, Postman, Maven

WORK EXPERIENCE

Full Stack Web Developer (Internship)
SevenMentor Pvt Ltd, Pune   August 2024 - August 2025

- Built and deployed multiple full-stack applications using Java, Servlets, JSP, Spring Boot, MySQL, and React.js, improving API response time by 30%."
- Developed Animaxx and GaraInLine, demonstrating proficiency across both backend and frontend development.
- Collaborated on group projects, improving teamwork and problem-solving skills.
- Faced challenges with frontend-backend integration and solved them by restructuring API endpoints and using Axios/Fetch for smooth communication.
- Implemented session handling and cache control to secure user authentication and prevent unauthorized access Which Reduced authentication errors by 40%.

EDUCATION

University of Mumbai (BNN College)   April 2021 - December 2024
Bachelor of Science (B.Sc.) in Computer Science
Coursework: Data Security, Algorithms, Data Science.

PROJECTS

Animaxx (React Frontend Project)

- Personal project for discovering and sharing wallpapers, inspired by Pinterest.
- Built using React.js, JavaScript (ES6+), HTML5, CSS3 And GSAP animations.
- Solved challenges with state management and reusable components by modularizing code and using React hooks.
- Increased user engagement by 30% through responsive UI and optimized state management.
- Converted Figma/UI designs into responsive, pixel-perfect interfaces.

GaraInLine (Java + Servlets Backend Project)

- Designed backend logic using Java Servlets, JSP, JDBC.
- Focused on session management, authentication, and secure data handling.
- Solved issues with browser caching and back-button navigation using cache-control headers and session validation.

Data Management System (React + Spring Boot + Java)

- Full-stack project integrating React frontend with Spring Boot backend APIs.
- Implemented CRUD operations with SQL database and optimized API performance.
- Faced integration challenges between frontend and backend; resolved by restructuring API endpoints and improving error handling. validation.
- Reduced API response time by 20% after restructuring endpoints.

STRENGTH

- Strong logical reasoning and problem-solving
- Quick learner, adaptable to new technologies
- Detail-oriented with focus on clean, maintainable code
- Effective collaborator in team projects

Certifications

- Full Stack Web Development – SevenMentor (2024)
